State IT Center

What We Do!

infra

Manage Infrastructure for IT ecosystem in the state

assist

Strengthening department and govt bodies with digital transformation

promote

Promote IT/ITeS companies, EMCs, IT skill set in the state

innovate

Adopt new technologies for digital service delivery

Brief Overview of Organisation Capacity

GIS wing under MAP_IT has mentored a team of developers to assist with geo spatial technologies and GIS based support system. The same team now specialises in uses of Drone based image capturing and processing for use in various applications.
GIS

Team of more than 250 software developers are working on different IT projects including CCTNS, RCMS, ALPAAS, e-auction for Forest produce, HRMS, online DE among others

CoE

Empanelled with CERT-IN for security audit since 2016 with in house security audit team. More than 450 applications audited so far.

Security Audit Team

Key Highlights

- First state to migrate to SD-WAN (Software defined Wide Area Network)

- Introduced eFIR, eVivechana in existing CAS for CCTNS

- End to end process automation for different departments using in-house software development team

- Creating digital work flow for transparent case disposal with different Case Management Systems

- Online Work management system for creating digital work flow for different works departments

- Creating solutions for use cases of AI/ ML. WIP includes crop prediction using satellite images, generating PoIs for department using historical data

Different Case Management Systems

"Case Management system is a solution for the automation of courts process. It's a citizen centric solution that creates the transparency of court work for citizens."

About Project

Statistics:
Total Courts- 1500
Cases Registered- 101+ Lakhs
Disposed Cases- 94 + Lakhs
Integration with- MP Online, CSC & LSK

About Project

Commercial tax appellate board project aims to streamline their appeal process i.e. to incorporate form-43 and other compliance pertaining to commercial tax.

About Project

For labour related cases

Revenue Case Management System

Arbitration Tribunal Case Management System

Commercial Tax Appellate Case Management System

Lokayukt Complaint Management System

Labour Case Management System

Real Estate Appellate Tribunal

About Project

System for managing the functionality of arbitration tribunal. It is a citizen centric application which provides the facility for citizen to apply case online, view status and download the order.

About Project

Intranet based complete management system which manages complaints.
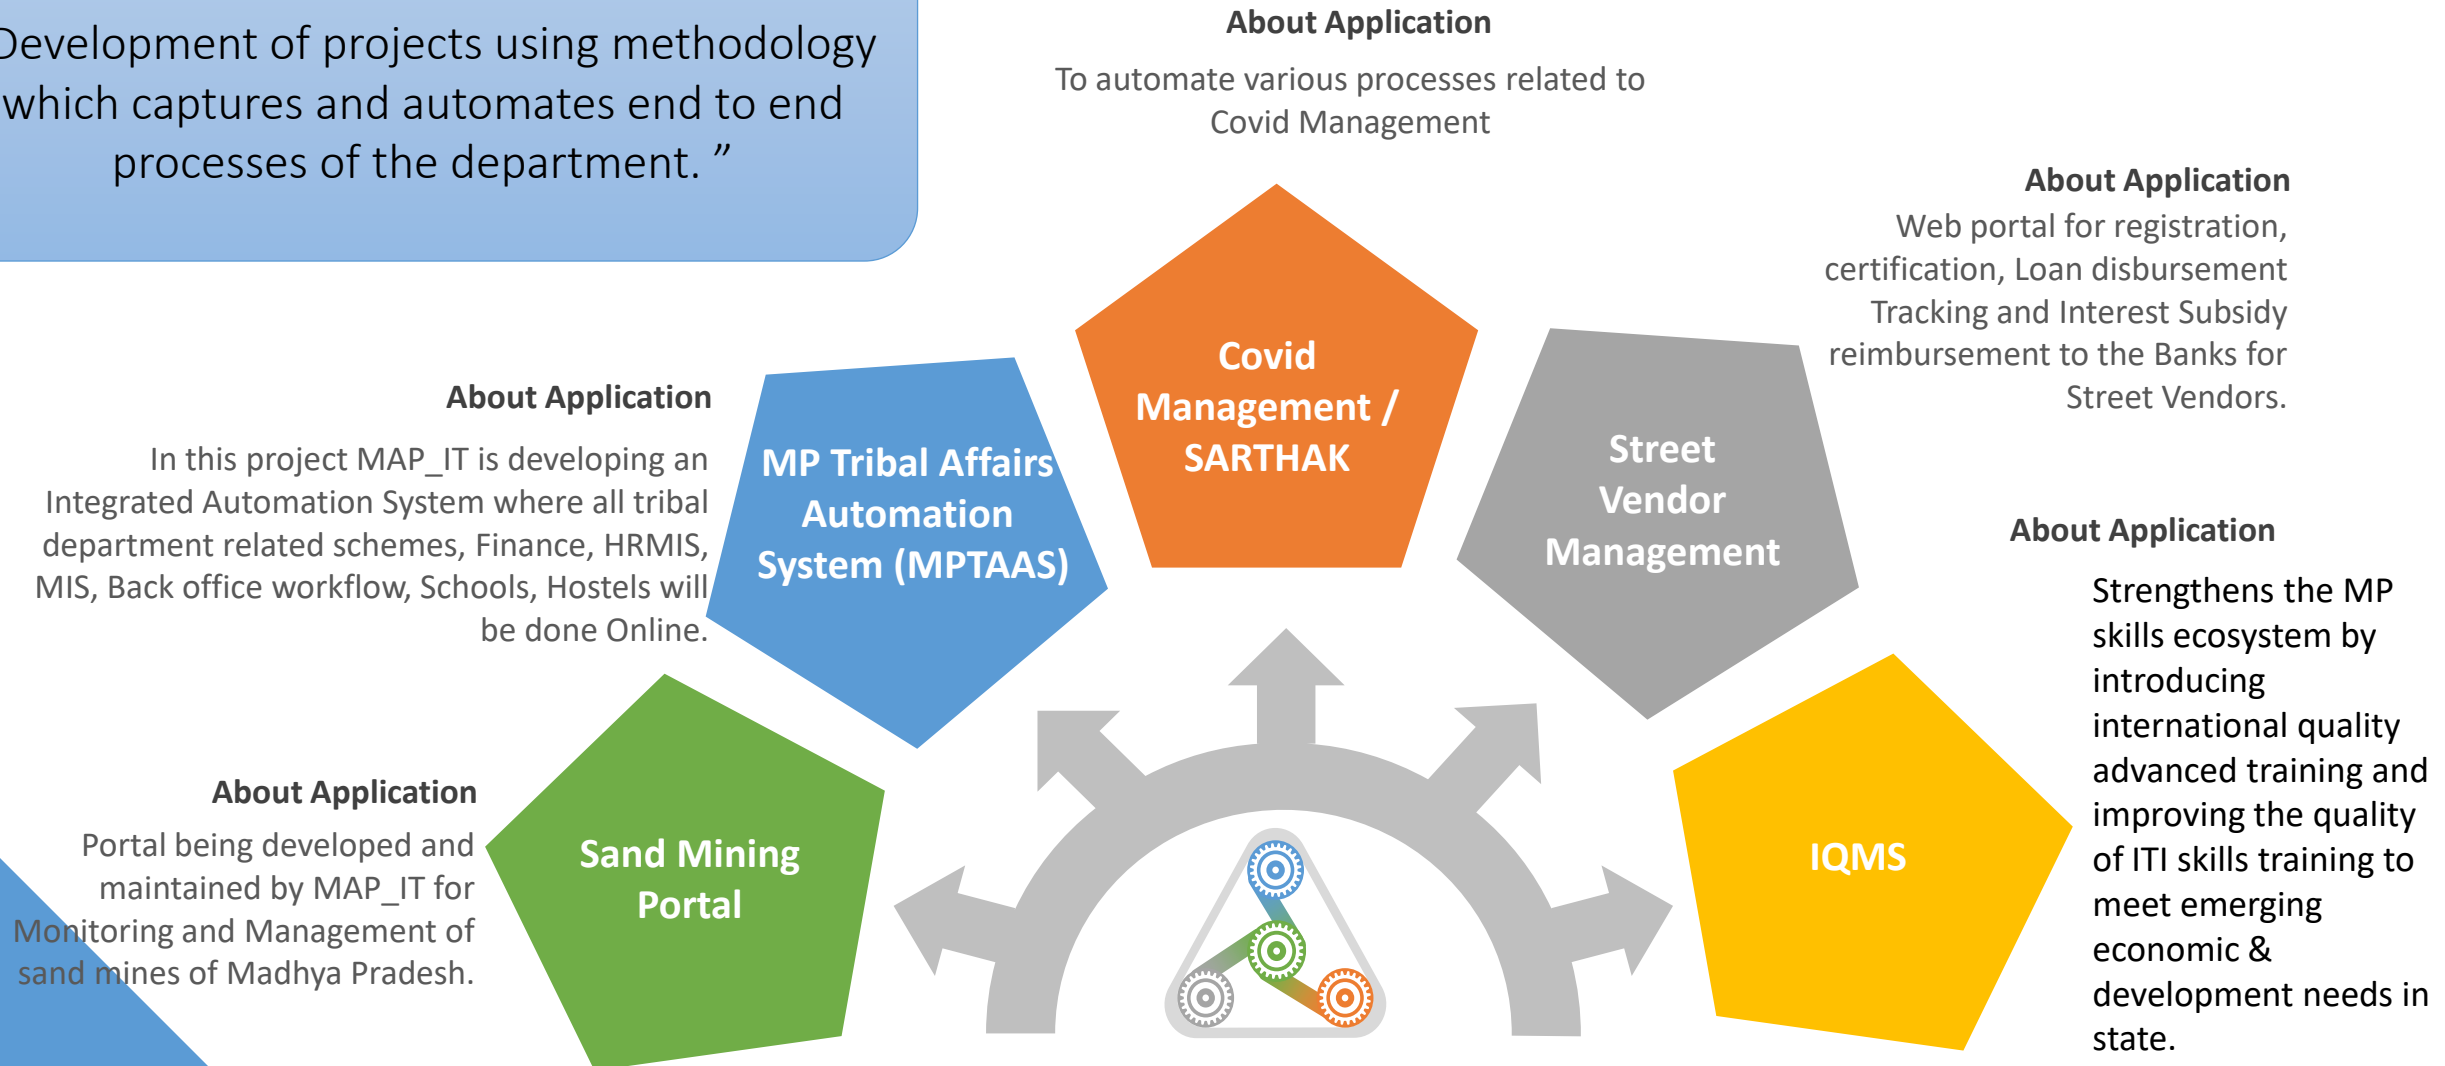

About Project

Real Estate Appellate Tribunal CMS provides platform to the Agents / Consumers to appeal against the RERA

End-to-End Automation

"Development of projects using methodology which captures and automates end to end processes of the department. "

About Application

To automate various processes related to Covid Management

About Application

Web portal for registration, certification, Loan disbursement Tracking and Interest Subsidy reimbursement to the Banks for Street Vendors.

About Application

In this project MAP_IT is developing an Integrated Automation System where all tribal department related schemes, Finance, HRMIS, MIS, Back office workflow, Schools, Hostels will be done Online.

About Application

Strengthens the MP skills ecosystem by introducing international quality advanced training and improving the quality of ITI skills training to meet emerging economic & development needs in state.

About Application

Portal being developed and maintained by MAP_IT for Monitoring and Management of sand mines of Madhya Pradesh.

Covid Management / SARTHAK

MP Tribal Affairs Automation System (MPTAAS)

Street Vendor Management

Sand Mining Portal

IQMS

Add on modules for Agriculture & Land Records

Various applications developed to streamline process for farmers to get benefits from the government programmes.

SAARA	**PM-Kisan**	**CM Solar Pump**	**MP Kisan**	**Revenue Demand Generation & Collection-Irrigation**	**PMFBY**
Smart Apps for Revenue Administration (SAARA) is a collection of - Girdavari, - Bhumi Darpan, - Crop Loss Survey - Swamitva - Dharnadhikar - CM Kisan	Developed on existing Land Records System for easy identification of beneficiaries for Pradhan Mantri Kisan Samman Nidhi	This portal is a paperless and cashless solution to automate the process for availing subsidies on solar pumps.	MP Kisan app is envisaged as one stop mobile app for different farmer related activities. About 7 lac farmers are onboarded in application and using it for eUparjan Registration, Plot Demonstration.	Automation of Canal irrigation charges	automated processes of Crop Insurance using Land Records. Crop cutting experiment, claim settlement are part of the project.

Services and Integration

For end-end work flow automation and digital service delivery MPSeDC is continuously working for integrating various services.

Road ahead

Paperless service delivery
Bringing different datasets together with online payments and verification services

01

Onboarding new platforms
Facilitating procurement of Cloud based product platforms such as LCNC, ML tools, drone services

02

Strengthening security framework
Upgrading existing infrastructure to create resilient infra against ever evolving cyber threats

03

Vibrant IT ecosystem in the state
Development of IT parks on PPP model, promoting online LMS platforms, strengthening IT infrastructure

04

THANK YOU
